WEB DEVELOPER

Dedicated Web Developer with a Bachelor's degree in Computer Science, seeking new opportunities. Experienced in developing web applications and proficient in Laravel, PostgreSQL, Vue.js, TypeScript, and version control with Git. Previously developed a marketplace website as a Full-Stack Developer at PT Teknologi Perdagangan Lilasia, with additional freelance experience at STMIK Mercusuar. Proficient in English and fluent in Indonesian.

PROFESSIONAL EXPERIENCE

PT Teknologi Perdangan Lilasia   **Jan 2024 - Nov 2024**
Fullstack Developer
- Developed the Lilasia.id marketplace using Laravel, PostgreSQL, and Vue.js, enhance website performance and improve user experience.
- Created a custom Vue.js UI library to increase styles consistency across multiple projects.
- Built a company blog on WordPress to enhance content marketing and engagement.

PT Baracipta Esa Engineering   **Aug 2022 - Dec 2022**
Fullstack Developer Intern
Contributed to the development of the RAB website for Estimator.id as part of a team. Gained hands-on experience in team collaboration using Git and in creating and consuming REST APIs.

STMIK Mercusuar   **Apr 2021 - July 2022**
Web Developer Freelance
Designed and implemented multiple web applications to address internal campus needs, including:
- **SIAKRIPSI**: Thesis and practical work guidance system.
- **SIKEU**: Student financial management system.
- **E-KTM**: Student ID card verification website.
- **Admission**: New student admissions system.
- **Transcript Management**: System for managing student transcripts.

EDUCATION & CERTIFICATIONS

- **B.Sc. Computer Science**, University of Bina Sarana Informatika, Jakarta.   **2019–2023**
  - **GPA**: 3.97
  - **Coordinator of Public Relations and Documentation,** Software Engineering Student Association.
- **Program Analyst Certification**, National Professional Certification Board (BNSP).   **2022–2025**

TECHNOLOGIES AND LANGUAGES

- **Languages & Frameworks**: HTML, CSS, Javascript, Typescript, PHP, Laravel, Vue.js, TailwindCSS
- **Tools**: Git, MySQL, PostgreSQL, Linux, Neovim
- **Methodologies**: Agile/Scrum, Domain Driven Acrhitecture
- **Soft Skills**: Adaptability, Teamwork, Critical Thinking

PROJECTS

- **Personal Blog**, My personal blog, built using Nuxt.js and Supabase, this project is where i share my thoughts and experiences with the technologies I use. See the website on aprizqy.com.
- **Portfolio Website**, My portfolio website to showcasing my work, skill, and projects. It hightlights my expertise in web development and demonstrates my ability to build responsive, and user-friendly websites. See the website on dev.aprizqy.com.
- **Spotify Track Recommendation**, A Spotify track recommendation app based on chosen vibes/genres, utilizing Vue.js and Spotify API. This app features the ability to generate track recommendations and save them as a playlist. Unfortunately, the Spotify API recommendations endpoint was deprecated on November 27, 2024, so this project is no longer usable. However, the source code is still available on GitHub.

INTERESTS

- Contributing to open-source projects.
- Exploring new web development frameworks and tools.
- Learning about AI and machine learning.
